Overhead Projector and Monitor Displays

Both halls have overhead projectors that can be used by our customers. In addition, the large hall has TV Monitors. Our customers are allowed to use devices provided they provide their computer, computer files and an HDMI cable for interfacing with our equipment. It is recommended that customers come in prior to the event to ensure their programs and devices are working up to their expectations. Additionally, we request the customer to notify us prior to the event to allow us time to set up the equipment.

Please note, we have found MAC IOS computers may require special settings for proper operation. It is important to test the programs prior to the event.

Additionally, we have a Welcoming Digital Display in the main hallway. If you would like us to display a few photos or event flyers, please provide the following information:

Event Purpose _____

Person or Organization Name _____

Please provide this information at least 2 weeks in advance of the event and email copies to kofc8960@yahoo.com.
